Computer technical and network experience includes Windows 95/98, NT, DOS and Macintosh systems. Troubleshooting networks and individual systems, configuring, installing, and repairing hardware, operating systems, and applications, creating and updating websites.

Instruction experience includes in-classroom (including corrections facilities), seminar, and one-on-one training in computers (main frames, IBM PC compatibles, Macintosh, Amiga and HP) and computer applications, (DOS, Windows, PageMaker, WordPerfect, Microsoft Word, Excel, Access, PowerPoint, Microsoft Works, ClarisWorks, FileMaker Pro, AutoCAD and others) manual drafting, architectural rendering and building mechanical systems.

Instruction techniques include personally developed PowerPoint presentations, handouts, overheads, on-line demonstrations, web pages, and white board notations. I am dedicated to practical college and career oriented education, and enthusiastic to provide opportunities for individuals to enhance job skills. I provide a combination of knowledge, teaching skills, encouragement and creativity; giving students the opportunity to achieve their potential.

Architectural experience covers the full range of architectural services with emphasis in computer system management, presentation renderings, project management/ quality control, drafting and personnel supervision/ training. Extensive experience in job billing, job accounting/ scheduling, computer programming/ operation, agency approvals and civil engineering/ site planning. Comprehensive experience in construction contract admin.
