MRGS to MPII Interface Unit

IU100

Features

- Provides an interface between the host rang communications link (HRCL) and the MRGS allowing the range users to use their existing Full-rate Production (FRP) MRGSs with the new Message Processor II (MPII) base ARDS Data Link Ground System with minimal re-configuration.
- Emulates original MP interface for the FRP MRGSs and provides an industry standard RS422/SDLC synchronous interface on the MPII/HRCL side.
- Distributed timing and frame synchronization. All MRGS one-second frame boundaries are synchronized to GPS 1PPS to eliminate the HRCL from the critical timing path.
- Provides increased network stability.
- The MMIU in conjunction with the MPII allows ranges to install MRGSs several hundred miles away from the MPII.
- An Ethernet Bridge may be used at the remote site to provide a 10BASET Ethernet connection to the HRCL.

MRGS to MPII Interface Unit

IU100

Specifications

Parameter	Value
Input Voltage	7-30 VDC
Input Power	~12W
1PPS	Single Ended or Differential
Operating Temp	-40 to + 85 DegC
Storage Temp	-40 to +85 DegC
Humidity	5-95% non-condensing
System Architecture	PC/104
Dimensions	7.5"L x 6"W x 6"H

Also Available:

MRGS Upgrade Kit(P/N: MRGS-KIT-01)

Kit Includes:

MMIU

24V AC/DC Power Supply (120V AC Input)

Trimble Thunderbolt GPS Receiver with Holdover

WebRanger II Ethernet Bridge

Interconnect Cables

This kit includes everything needed to convert your existing FRP MRGS to an MPII compatible MRGS. All that is required is an interface cable from your communications equipment to the Ethernet Bridge if using RS422/HDLC over the communications link. Ethernet cables are not provided.
