

Nature has the Answer!

OrganoZone

Has the Solution!

Plants have been fighting insect pests for millenniums and have developed powerful defenses against such problems. OrganoZone, creators of **Mr.Mite-E** use only food grade ingredients and plant extracts in manufacturing this incredible garden defending spray.

Mr.Mite-E is a powerful pest control product made from food grade ingredients, essential oils and plant extracts and is composed of over 15 active ingredients with the key components being cinnamon, cayenne pepper and garlic.

Cinnamon is to insects, a powerful central nervous system toxin and interferes with certain octa-dopamine receptors. As neither fish, nor birds nor mammals have these specific receptors, they are not affected. Insects such as aphids, thrips, spider mites, whitefly, leaf hoppers, ants and most other garden pests are easily and quickly dispatched to their doom by **Mr.Mite-E**.

Included in the formulation are essential oils long known for their anti-fungal actions and ability to fight mold. Thus **Mr.Mite-E** is also a powerful anti-fungal spray and deals very effectively with powdery mold. Incidentally, deer find the taste most unpleasant.

Being composed of ingredients which are generally recognized as safe and manufactured by a couple of Freeman-on-the-Land, the makers of **Mr.Mite-E** have lawfully claimed exemption from registration under the Pest Control Product Act. (We are the first in Canada to do so!) The product is safe to use right up to harvest and is safe for all plants, indoors or out, be they fruits and vegetables, house plants, herbs or flowers.

This highly concentrated formula is available in 250ml bottles and is sufficient for 10L of control solution, 5L of attack solution, or 1L of wasp and hornet killer.

Shipped in cases of 25 bottles @ \$8/bottle the price/case is only \$200 and the small size bottles mean valuable shelf space is conserved.

Order by the end of July and receive a free DVD titled "Bursting Bubbles of Government Deception" and learn what a Freeman-on-the-Land is capable of!
