

APOLLO VII INFORMATION-MAY 1998 (revised January 2005)

Apollo VII, team 4534 an officially chartered team of REACT International, Inc. Came into being in August, 1982,

It's members are from all over the northeast/north shore covering a Range of 16 suburbs .

Being involved in community service projects is part of the Teams responsibility. Its members participate in various events Such as: The Lake County Marathon, MS Bike N Hike , MS Super City Walk , ect.

It is the primary responsibility of all REACT team members to Monitor the CB emergency Channel 9. While we cannot achieve a 24 Hour coverage on this channel, it is a goal for all teams to strive for. As monitors we assist motorists., report accidents and traffic problems, And offer any possible assistance we can (making personal phone calls, Helping change a tire, finding an open filling station Etc)

Many team members have CB radios in their cars and several have Base units in their homes. Since a base unit can receive and Transmit further distances than a mobile, they can frequently Relay information heard from a mobile and make the appropriate Phone calls or decisions.

Most people who own CB radios realize how helpful they are when It comes to road, traffic and weather conditions, accidents, local Information and the like. Being a helpful Cber is part of The job of the REACT member. How many times have we called out Reports on the CB regarding a runaway child, a lost pet, a deer Obstructing traffic, cattle lose on an interstate, severe hold ups due to An over turned semi, hazardous driving conditions, a Family of ducks crossing a road, a car going the wrong way down a Major highway ? Countless time ! but that is what a Cber, a Concerned citizen, a member of REACT, a member of Apollo VII, is All about in his or her own way,, a member provides a voluntary Service to others the reward for which is the satisfaction of helping Of helping others.

It is an easy-going and cohesive group which also enjoys being together as Special parties, fund-raising events, and social affairs.

At the same time the team is very proud of it's achievements as it Continues to be an important service organization for its Communities, its neighbors and its friends.

We also Monitor GMRS (UHF) Business band, Family Radio, Amateur radio

Submitted by Joel Kogen Co-Vice President of Apollo VII REACT
