CURRICULUM VITAE

January 20th, 2004

Profile:

Currently the IT Director / Network Administration / Webmaster of iLanguage (www.ilanguage.com), a global translation and localization company with head office in Santa Monica, USA and production center in the Dominican Republic. I am considering a change of my profession.

I have lived on the north coast of the Dominican Republic since February 1993, I have legal resident status and full permanent work permit in the DR.

Current responsibilities:

My current responsibilities as the IT Director / Sr. Network Administrator / Webmaster include:

- Effectively administering a team of IT professionals working with many different technologies to complete customer projects on-time, and on-budget.
- Local and internet based network administration for offices in the Dominican Republic and U.S.A. including Linux mail servers, DNS and web servers, J2EE platform servers, Sun Microsystems servers, Windows 2000 based file, name, web, ftp and mail servers.
- Supporting production department to map out, plan and realize the end project submitted by clients. Finding solutions to problems before the production mode of the project.
- Responsible for all computer security related issues.
- Hardware/software support for end users.
- Component level repairs of hardware.
- Training users in current and new applications. Managing user accounts for employee hires, changes and terminations
- Network installation/cabling, balancing and configuration -operation/installation of PBX phone and voice systems.
- Installing and supporting NSC network, server, PC, PDA and telephone systems
- Assisting users with NSC-supported PC, PDA and communications products and systems
- Maintaining supply inventories
