THE A-TEAM VAN

THIS IS A MODEL OF A GMC VANDURA FROM THE G-SERIES. ITS V8 ENGINE WAS UPGRADED BY THE UNIVERSAL STUDIOS TO 230 HP. IN THE TV-SHOW, "SEARGANT B. A. BARACUS" DRIVES THE VAN.

1. START WITH PART B-1 AND CUT THE TWO LINES FOR THE TAIL WING, THE TWO LINES FOR THE SUN PROTECTION AND THE FOUR LINES FOR THE ADDITIONAL LIGHTS ON THE ROOF. THEN GLUE IT WITH PARTS A-1 AND A-2.
2. NOW ATTACH B-2, B-3, B-4, B-8 AND B-9.
3. TAKE PART A-3 AND GLUE THE TWO AXLES THEN ADD IT TO THE VAN.
4. MAKE FOUR WHEELS WITH PARTS B-5, B-6 AND B-7 AND GLUE THEM TO THE AXLES. AS FAR AS I KNOW, THE FRONT WHEELS ARE A BIT LOWER THAN THE REAR.
5. ATTACH PARTS A-4 AND A-5 TO THE BASE PLATE.

CONGRATULATIONS! YOUR A-TEAM VAN HAS BEEN FINISHED.
