Played it awhile and didn't quite enjoy it. No doubt nice graphics and such but tapping
constantly on the max credits isn't exactly fun. They might as well include an auto option
to play until you lose all your "money". 😞

You thinks? I am not exactly a great Jackpot fan but definitely not for this Palm game. I'll rather go for the real thing. 🎰 The Jackpot Machines are a lot more interesting with great graphics and sound, and exciting since REAL money is involved. Its definitely more addictive. 🎰 😊

put themselves in the shoes of gamers

 **to prove a point**

although most of the slots
are supposed to pay real odds
and is quite difficult to win,
unless you select the easy win option...

the 5-line is rather simple to win

look at this winning shot below
