### Diagnostic Imaging Report

**Date of exam:** July 21, 2011

**VRA Veterinarian:** Dr. Saylor

**Patient information:**

Client Name: Kenny  
Patient Name: Pinuki  
Patient number: 97854  
Age: 7 years  
Sex: Female spayed  
Breed: Bernese Mountain Dog

**History:** Anemia, epistaxis

**Modality:** Ultrasound

**Study:** Abdomen

**Ultrasound Findings:**

The gallbladder, liver, spleen, kidneys, adrenal glands, urinary bladder, stomach, small intestine, and colon are normal. The pancreas is not definitively identified but the area of the pancreas is normal. The medial iliac lymph nodes are not observed. There is no evidence of intra-abdominal lymphadenopathy. No abdominal effusion is observed.

**Ultrasound Conclusions:**

Normal abdomen.

A handwritten signature in dark ink, appearing to read 'Matthew Baron', with a long horizontal flourish extending to the right.

Matthew Baron DVM, DACVR
