### America's Challenge to the Great European Road Cars.

How does a nice home-grown Mustang come off standing up to the great road cars of Europe? Beautifully! With great looks and handling. At a fraction of the price.

Six models to choose from. Three rooflines. A wide choice of engines including an economical Six. A long list of standard features that include DirectAir Ventilation, new mini-console, an all-new instrument panel, and new slim-profile bucket seats. Plus a lineup of luxury options like air condi-

tioning, power windows and Tilt Steering Wheel. And that's just a hint of what Mustang is all about in 1971.

Where Mustang really makes it happen is on the road, thanks to a great suspension system that takes full advantage of a longer wheelbase and a wider tread. Style, performance, handling options... Mustang puts them all together in a new and challenging way. Turns on the excitement and fun of driving a great road car.

**MUSTANG**
