UNIVERSAL ROBOT PROFILE

Robby the Robot

Designed by Dr Morbius (reverse engineered Adm Savage), produced by Krell Productions.
Home Servant, Security   75402-L2-UW5223-PEEM(S)   MCr1.0226751   1,056 kg
   Fuel=2   Duration= 0.3   TL=17
   40/100 (combat w/reflec)
   2 med arms

   1 visual sensor (+tele +PIR), 1 audio sensor (+sen), 1 olfactory sensor
   1 voder, 1 taste sensor
   1 magnetic sensor, 1 radiation sensor
   1 spotlight, 1 speaker, 1 power interface, 1 program interface
   1 master unit
   1 radio (500km)

   1 holo recorder (3D)

   electronic circuit protection

   2 Focused EMP Ray
   Science-4, Pilot-2, Navigaor-4, Steward-3, Medical-1, Survey-1, Grav Vehicle-1
   ATV-2, Gunnery-1, Electronic-3, Mechanical-3, Engineering-3, Gravitics-3, Communications-3
   Naval Architect-1, Language-15

   Valet-4, Linguistics-4, Close Combat-2, Weapon Handling-2
   Security-2, Infantry Ground Combat-1, Cargo Handling-2, Emotion Simulation

   NOTES:
      1. Robby was designed from basic Krell technology. A typical Krellian child's project.
      2. 2.23m tall. The original skeleton is adamantium steel with a lift capability greater of 10 times
      his weight.

      3. Alternative designs include laser pistol instead of EMP pulse and crystal storage
      4. Micro Analysis Lab
      5. Secondary Crystal Storage
               a. Secondary programs include a maximum of 200units. typically languages and options
               that can be switched out over a 5 min interval.
               b. Micro Crystal storage is available at TL16 for mass production. 1 Program Unit
               requires 1 round to load or unload..
      6. Property of Altaira (Morbius) Adams
      7. Robby's micro lab can access a large production lab for larger jobs.
      8. EMP Pulse Ray – available at TL17. It can render any device non-functional with 50m.
