

My name is Bob Hart and I live at 4208 Wyoming in South Tampa. I have addressed the MPO before -- abet sometime ago.

I asked then for this body to stop any project that would destroy an entire community. Now we are here again -- millions of tax payer dollars later and I have the same request.

Perhaps there are some decision makers here who could care less about such things as quality of air, quality of life -- indeed agony of people. MPO long range transportation plan go and project NO elevated and NO bypass.

One thing we did not discuss before -- and that is the personal legacy you will leave -- a legacy that maybe only you, in future years, will know about.

Will you be proud to tell your grandchildren that "I helped save a thriving South Tampa community" --- OR will you just keep it to yourself -- that you voted to lay waste to an entire community.

You have the power to stop the carnage being proposed by the FDOT bureaucrats. Stop them -- Stop them -- Stop them. I will repeat my last comment the last time we met. Kill the unacceptable options being shoved down our throats -- and do it today! Anything else is totally irresponsible.
