

PRACTICE 13

A. Supply the missing words you need to read each number.

1. $.3 =$ three _____

2. $.06 =$ six _____

3. $.015 =$ fifteen _____

4. $4.2 =$ four _____ two _____

5. $8.07 =$ eight _____ seven _____

When you write decimals, decide how many places you need. Use zeros in places that are not filled.

Example: Write eleven and nine thousandths as a mixed decimal.

STEP 1. Write the whole number 11. 11

STEP 2. Decide how many places you need.
Thousandths need three places.

STEP 3. The number 9 needs only one place. 11.009
Put zeros in the first two decimal places.

B. Write each number as a decimal or a mixed decimal.

6. three tenths _____

7. thirteen thousandths _____

8. two hundredths _____
