For those about to **rock**, we design you.

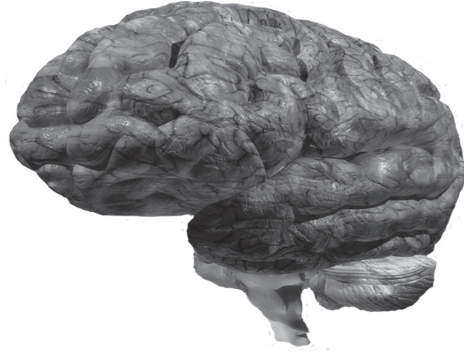

## Design Statement

Being a working musician, I see lots of CD's and posters in clubs/bars. I see what grabs my attention and what does not. I strive to create appealing, attention getting work so your fans will come to that concert, buy that CD, or hang the poster in their room. I like to use contrasting colors, out of the box designs and a hint of attitude. I specialize in posters, flyers, CD artwork, logos and 3-D modeling.

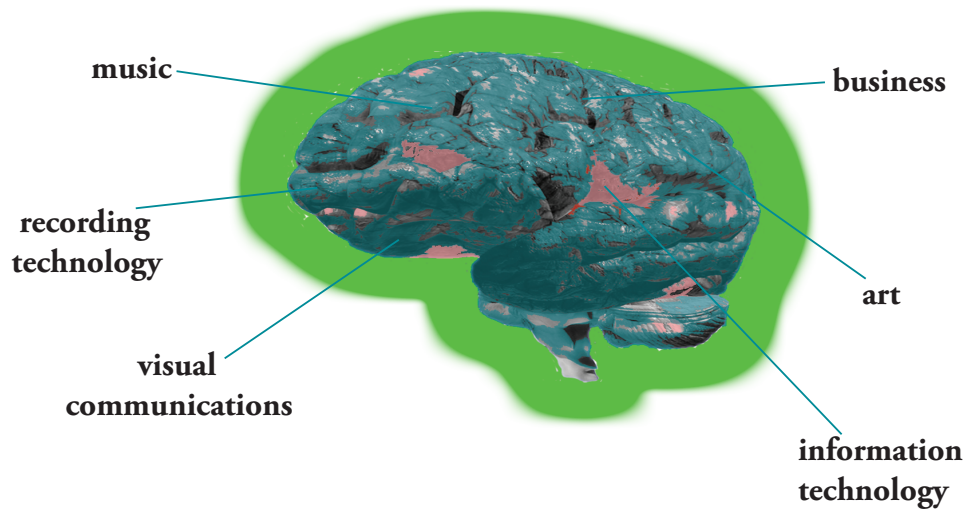

As a small business owner, I will offer my design services as another feature my own Love Muffin Records. Combining graphic design band logos and flyers with a radio & press promotional service will boost the diversity of the label.

Oliver Buck & the New Madrids' latest venture features a mix of both fully electric and acoustic songs and the addition of band members Quinn Sands and Mann Wolf.
