## Watch List

List of AddOns that show promise, but have difficulty interacting with other mods, or just aren't ready for prime time yet.

- Pawn <http://ui.worldofwar.net/ui.php?id=3999>
  - Adds item values to tool tips in a simple score. Like HealPoints does for healing gear, but for all gear.
  - Doesn't play nice with HealPoints, formula's are user generated; i.e. way too much setup to get working.
