

Maxs Awesom Guide to Saving Files from the Internet

Step 1: Open the site that the object is at.

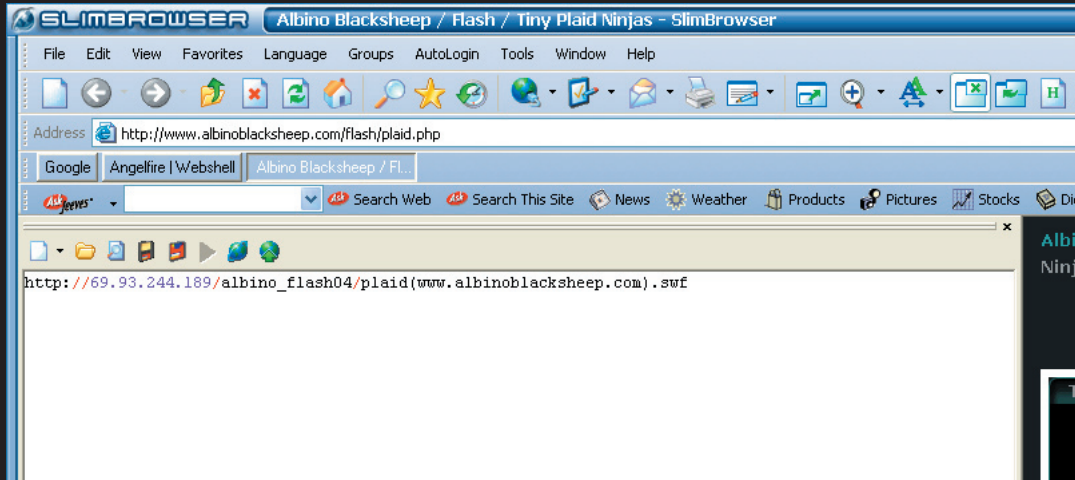

Step 2: Go to View, view source

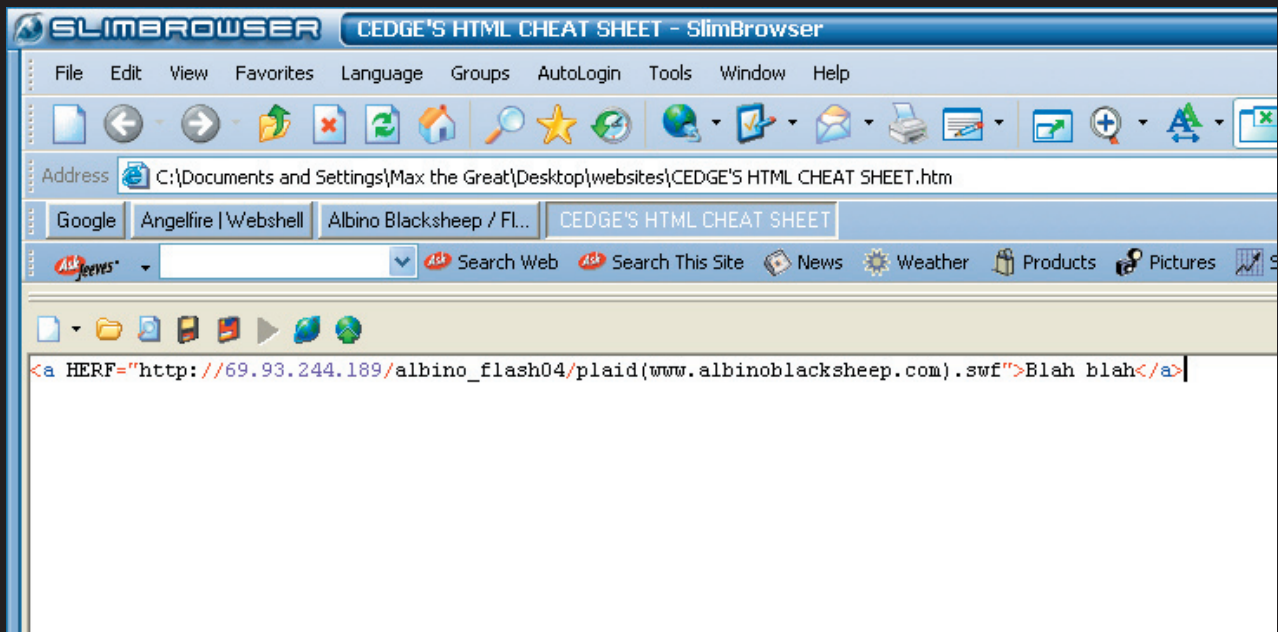

```
www.albinoblacksheep.com/flash/plaid.php
|Webshell | Albino Blacksheep / Fl...
Search Web Search This Site News Weather Products Pictures Stocks
Macromedia Flash Player / Tiny Plaid Ninjas
enter" cellpadding="0" cellspacing="0" border="0" ><tr><td valign="top" style="vertical-align="0" cellspacing="0" width="500" style="border: 6px outset;" align="center">
<td>
<div class="text center">
<h2 class="title"><span class="corner">&nbsp;</span>Tiny Plaid Ninjas <span class="auth
<table cellpadding="0" cellspacing="0" width="500" style="border: 0px outset; m
<tr><td><embed src="http://69.93.244.189/albino_flash04/plaid(www.albinoblacksh
<div style="text-align: right; margin-left: 1px;">
<script type="text/javascript" src="./script/6abs04.js"></script>
<script type="text/javascript"
src="http://pagead2.googleadsyndication.com/pagead/show_ads.js">
</script>
</div>
</td>
</div>
```

Step 3: Find the source, src, should be something like: <tr> <td> <embed src = "http://blhablabl-hab.swf"baklh other.stuff

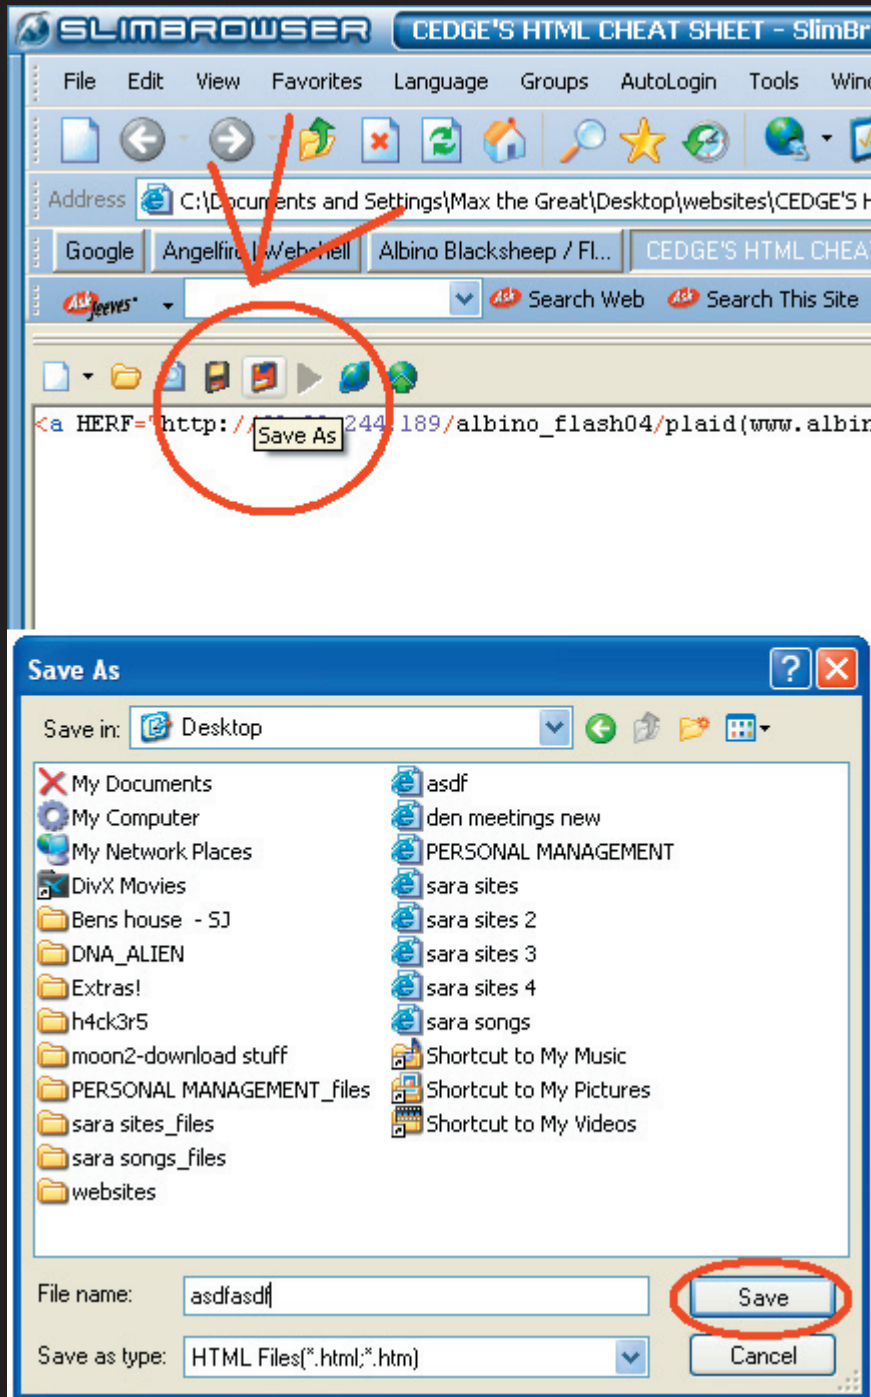

Step 4: Copy the address of the source and then select all and delete all of the other HTML. Now paste the address where the HTML used to be.

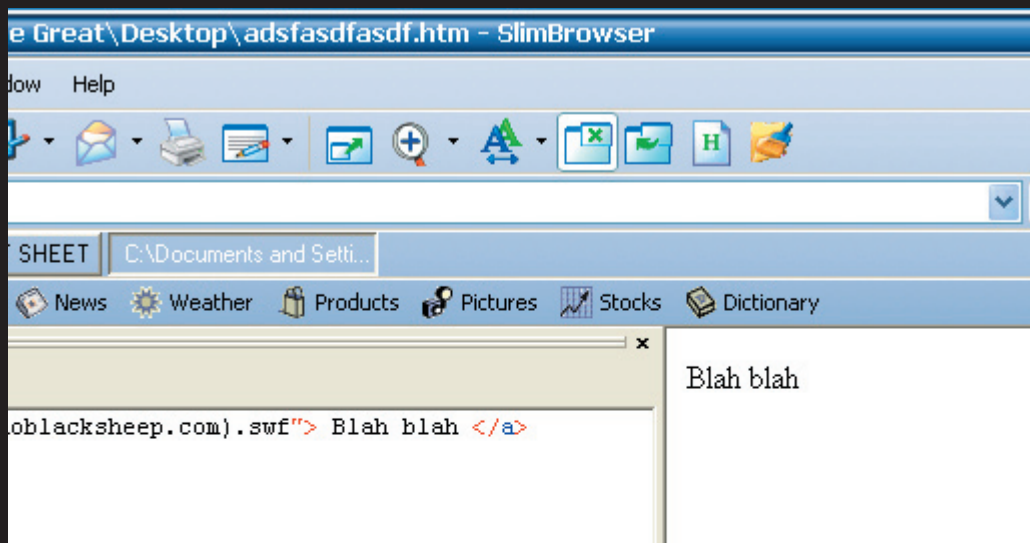

Step 5 (Learning some HTML): Now type `Doesnt Matter What goes here`

Step 6: IMPORTANT! Click the "Save As..." button and save it to the desktop, you can delete it later.

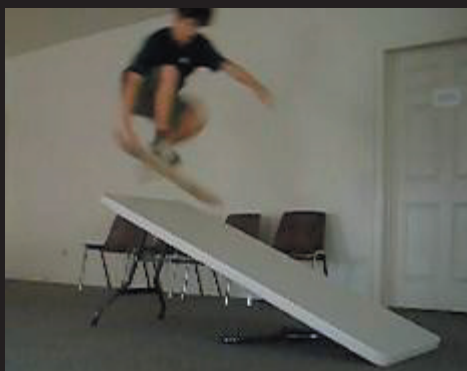

Step 7: Now click the brows button and some text should show up in blue, meaning a link, right click it and choose "Save Target As..." and save it to where you want it

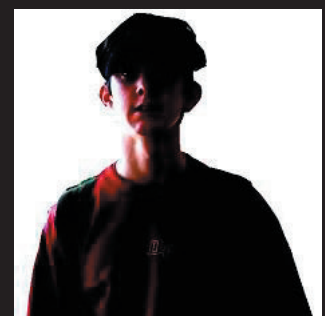

Note: the Reason the text isnt blue and link like in the above pic, i think is because i was off line and the link wouldnt work, but other wise should.

This wonderful guide was brought to you by Max the Great

Please visit his site for more information on what he dose, or more specificialy, what he dosent do.
