

## ELECTRON BUS

### ADDRESSING THE NEEDS OF INDIVIDUAL COMPUTER USERS AND SIMPLIFYING TECHNOLOGY FOR YOUR SECURITY.

If you were to review all the criteria that go into making a very successful networking technician, you will find that practical experience involving installation, configuration, and maintenance of networks to be the most important requirements in an internetwork environment.

*“ We are making technology easier so you can concentrate on what is important to you. Our certified professionals can handle your needs. ”*

This is far from an ideal world, and where you fall short is where you will have more work to do. We have academic and professional training in network theory, concepts, and operations including Ethernet, routers, TCP/IP suite, intranets, Web servers, DHCP and DNS servers.
