

CHIP CHARTS

CHIP CHARTS (IN METERS)

Note: Chips are measured on flat surface. To have accurate chips consider the elevation to the green. E.G. 56 meters to hole and hole is 3 meters above ball, you would want to hit it 59 meters. If elevation measured in Centimeters, 100cm=1M. The slope of the green would also affect your chip. Down slope chip shorter. Upslope chip a bit more. Also the Advanced shot setup can vary your distances by moving the ball Forward or Backward, as noted on chip charts.
