# Final Project                               #
# Due Date: Mar.5, 2001                                  #
# Objective: This project is to build an online notepad  #
#            application using CGI/Perl, database, HTML   #
#            and JavaScript.                             #
# ------------------------------------------------------ #
```
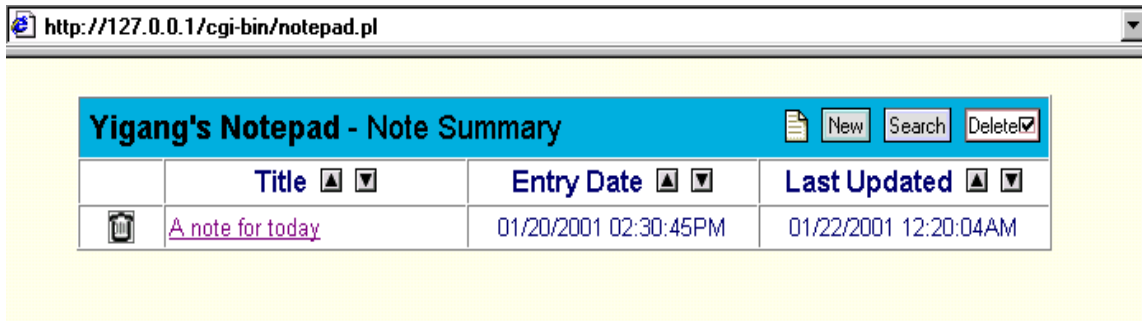

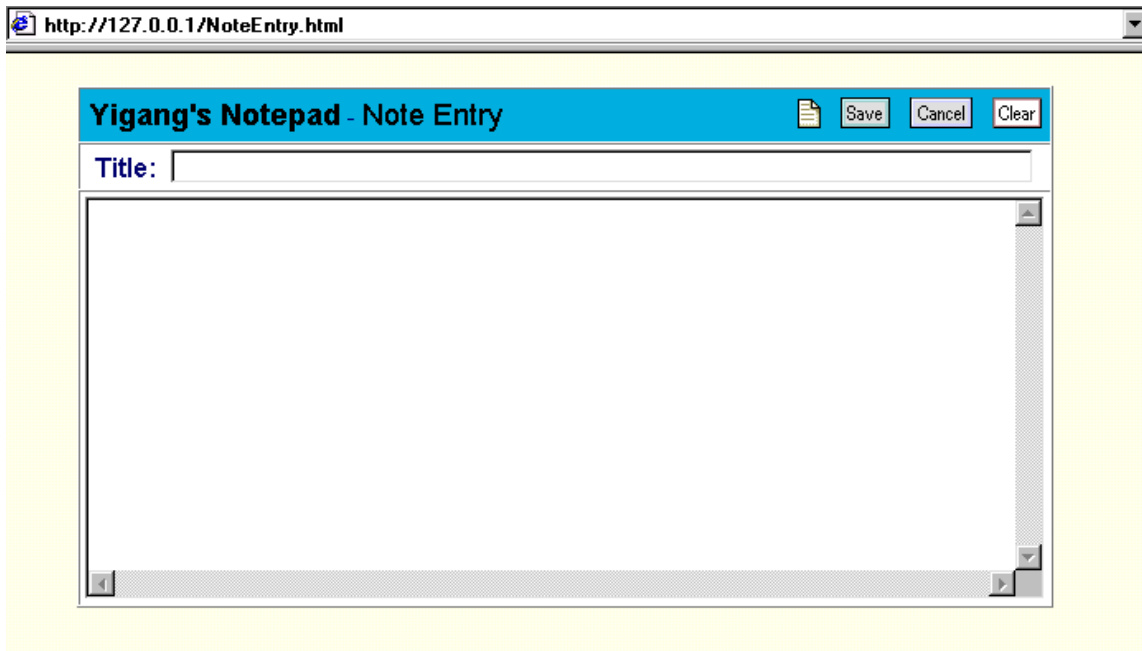

Screen Snapshots

Original note summary screen after launching program

Note entry screen after clicking New

Note summary screen after saving note "My calendar"

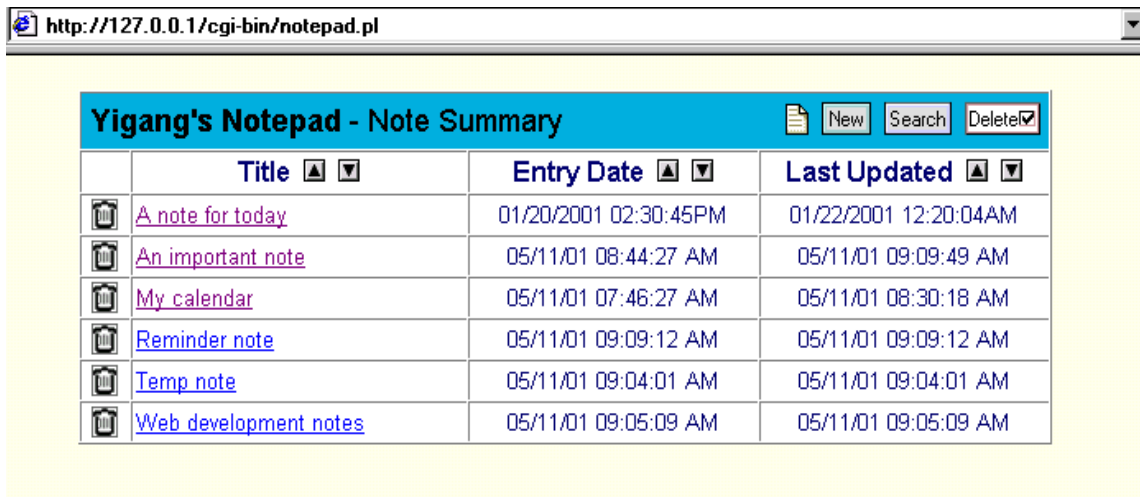

Note view/edit/update screen of "My calendar"

Note export success screen after clicking Export

The note 'My calendar' has been successfully exported into
the file 'My calendar.txt' in 'c:/perl56i/cgi-bin/' directory.
