## **Mission: Protection from the Weather**

**Part 1:** Design something to protect you from the elements (the cold, the rain, the snow, the wind, the sun). (*For example: Build a bus shelter to protect you as you wait for the bus in the morning.*) Be creative! You can begin your design below.

**Part 2:** Build your structure in class.  
Think about any supplies you might need from home.  
(We have straws and construction paper here at school.)
