

Two new perfin blocks turn up on Kansas/Nebraska stamps

The ink on the February *Bulletin* had barely dried when Steve Endicott's checklist of perfins on the Kansas-Nebraska overprints was out of date. A mint block of four of the 5¢ Nebraska with a U69 (UP) perfin went on the auction block at eBay. Endicott says the block had not previously been reported—and that it is the first perfin reported on Scott 674. Shortly afterward, Endicott obtained a used block of four (University of Kansas) perfin overprint. Blocks of the over-

prints with perfins on the 1¢ Kansas with the K60 perfin on the 1¢ Kansas stamps with perfins on the Kansas-Nebraska overprints, check the list Endicott published in the February *Bulletin* and then let him know what you have. It's obviously a continuing research project.
