Thanks as always for your letters. As usual, we are very busy around here. I am enclosing several recent articles which tell you what we are doing. Also, I recently spoke to John Fleischman who tells me you have been writing him. What he asked me to tell you was that he would love to help you, but you need to be specific in what you write. If you want to be deported back to Canada, he might be able to help but you have to send him a letter requesting that, along with all the facts in your case, length of your sentence, what your charge was, etc. He was horrified to hear that Robin Head in Texas is serving a ten year sentence, as well as your case- he didn't know we had such draconian laws here in the US. He is going to help us work on a state case in Montana that we believe will lead to the first state decriminalized prostitution in the country .More about that later. Meanwhile, please do contact him again, but this time be clear about what you want him to help you do. He is a good ally, and he will try his best to do something to get you out of there. Make your letter short and to the point with him, and give him everything he will need to help you. I hope it works out.

ds,
