Most viewed articles

Most viewed articles are the full-text articles from this journal that have been accessed most frequently within the last 90 days. The collection of most viewed articles below is updated weekly.

1. A strategy for determining the regional geoid by combining limited ground data with satellite-based global geopotential and topographical models: a case study of Iran

Kiamehr, R.

Published Print: February 2006

2. Combination of temporal gravity variations resulting from superconducting gravimeter (SG) recordings, GRACE satellite observations and global hydrology models

Neumeyer, J., Barthelmes, F.

Published Print: February 2006

3. Transformation from Cartesian to Geodetic Coordinates Accelerated by Halley's Method

Fukushima, T.

Published Print: March 2006

4. A Procedure for Estimating the Variance Function of Linear Models and for Checking the Appropriateness of Estimated Variances: A Case Study of GPS Carrier-phase Observations

Bischoff, W., Heck, B.

Published Print: March 2006

5. Comments and reply regarding Kotsakis (2005) "A type of biased estimators for linear models with uniformly biased data"

Koch, K., Kotsakis, C.

Published Print: February 2006
